

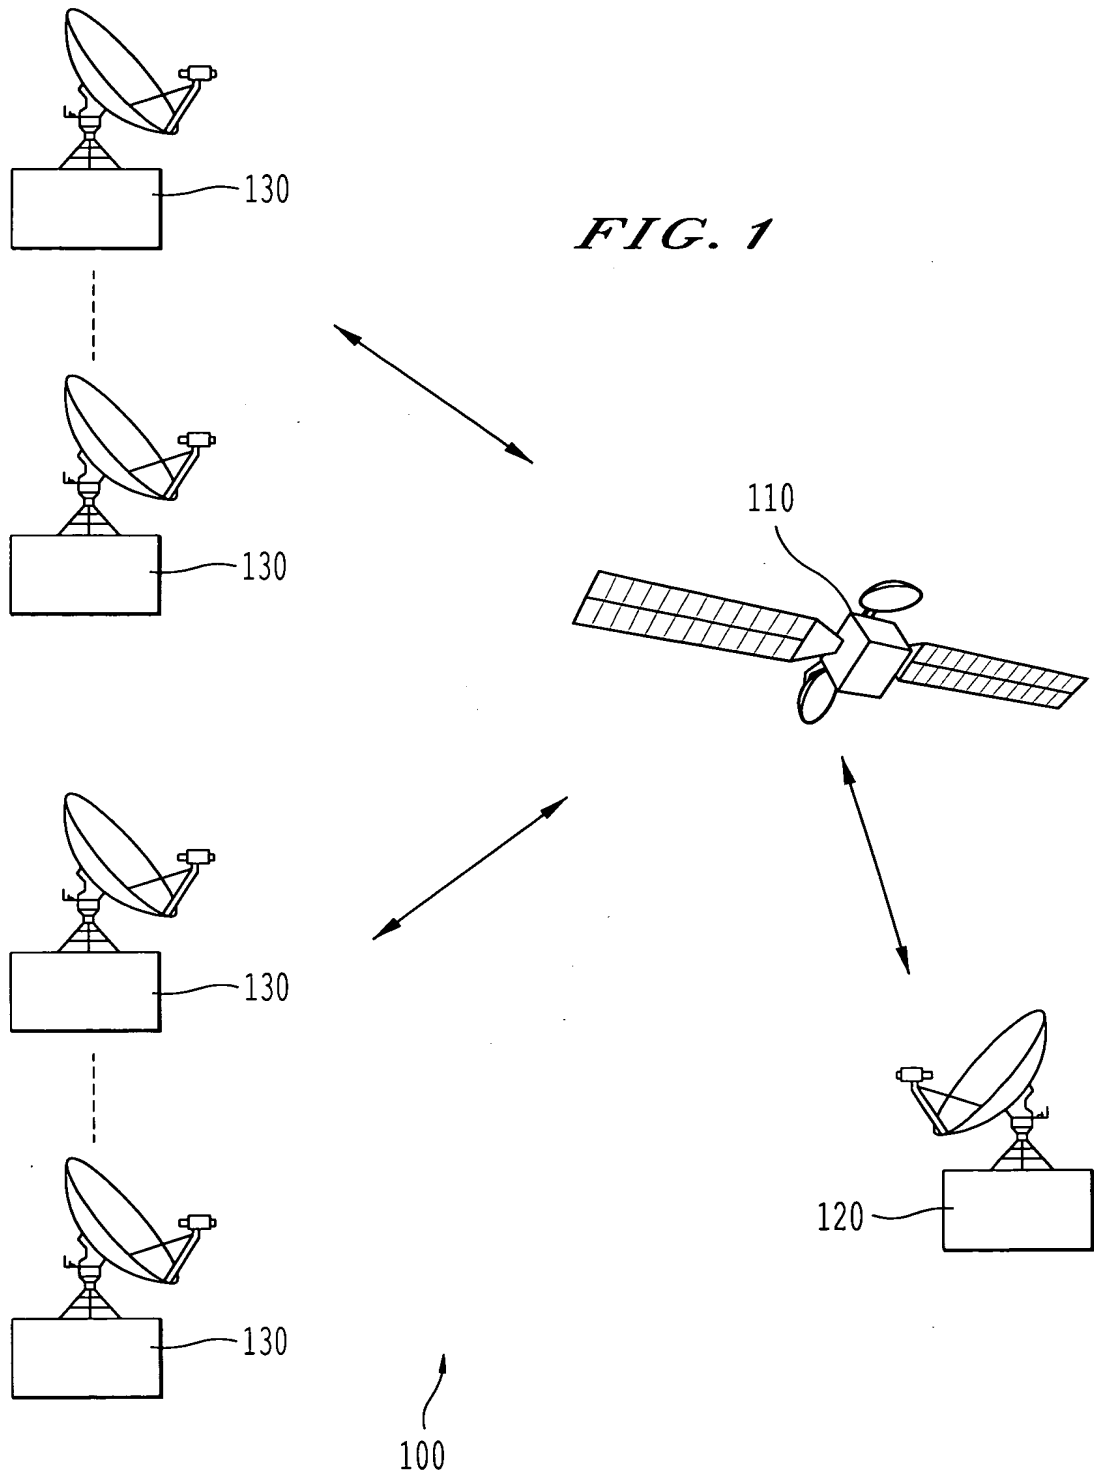

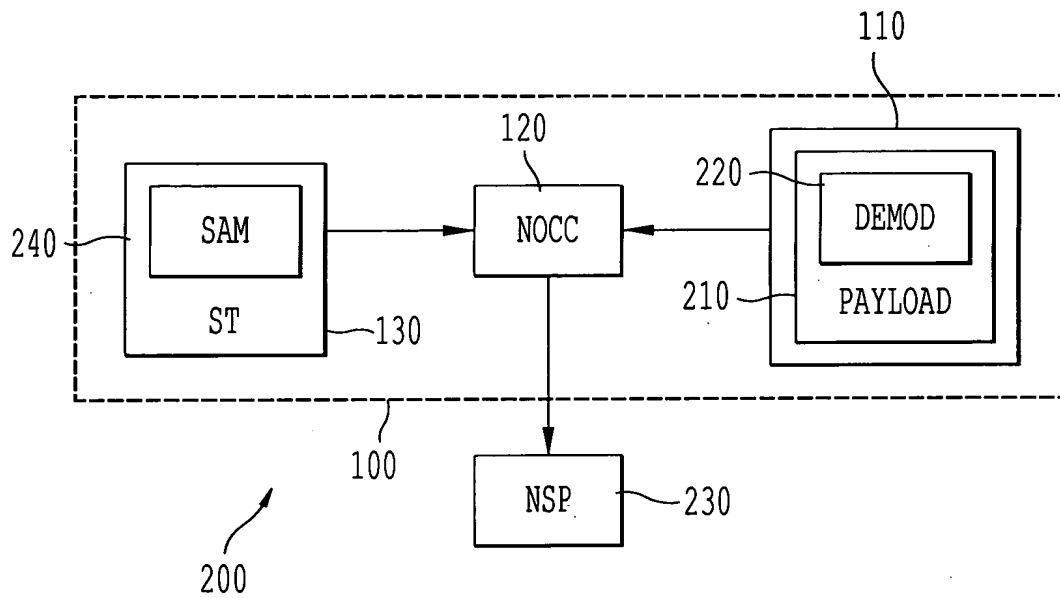

FIG. 1 is a schematic diagram of a satellite communication system 100. The system includes a satellite 110 and a plurality of ground stations 120 and 130. The ground stations 120 and 130 are connected to the satellite 110 via communication links. The ground stations 130 are arranged in a vertical column, and the ground station 120 is located below the ground stations 130. The satellite 110 is shown in a perspective view, and the ground stations 120 and 130 are shown in a top-down view.
